4.3 <i>Sorghum and Millets</i>	22
4.4 <i>Other Crops</i>	28
5. EXECUTIVE SUMMARY LIVESTOCK	34
5.1 <i>Livestock Condition.....</i>	43
5.2 <i>Calving rates.....</i>	48
5.3 <i>Cattle Marketing.....</i>	50
5.4 <i>Poultry.....</i>	54

6. LIVESTOCK HEALTH SITUATION	55
6.1 <i>Foot and Mouth Disease (FMD)</i>	55
6.2 <i>Rabies</i>	57
6.3 <i>Anthrax</i>	60
6.4 <i>Tick-Borne Diseases</i>	60
6.5 <i>Other Diseases of Cattle</i>	60
6.6 <i>Diseases of small stock</i>	61
6.7 <i>Livestock Mortality</i>	63
<i>Mortality in Small ruminants</i>	65

1. EXECUTIVE SUMMARY CROPS

TABLE 1: AREA (HA) PLANTED TO MAJOR CROPS

Crop	2014/2015	2013/2014	(+/-) %
Maize	1 531 663	1 721 030	-11
Sorghum	202 653	280 210	-28
Pearl Millet	155 684	192 009	-19
Finger Millet	26 369	29 590	-11
Groundnut	240 904	264 047	-9
Cowpeas	41 798	47 757	-12
Tobacco	108 307	107 371	1
Cotton	146 527	201 678	-27
Soyabeans	36 316	67 571	-46

TABLE 1A: CEREALS WRITE-OFF AREA (HA)

Crop	Area planted	Write-Off area	Harvestable area	%Write off
Maize	1 531 663	296 765	1 234 898	19
Sorghum	202 653	31 094	171 559	15
Pearl Millet	155 684	14 012	141 672	9
Finger Millet	26 369	264	26 105	1
Total	1 916 369	342 135	1 574 234	18

N.B Write-off area is expected to increase if the dry conditions persist

TABLE 2: AREA (HA) PLANTED TO OTHER CROPS

Crop	2014/15	2013/14	%
Sugarbean	26 609	39 257	-32
Roundnut	120 328	112 338	7
Tea	8 162	8 162	0
Coffee	673	654	3
Banana	4 643	4 643	0
Citrus	6 172	6 172	0
Irish potato	11 928	11 360	5
Macadamia nut	3 570	3 500	2
Apples	224	224	0
Mango	3 750	3 722	1
Curcubits (Pumpkins,squash, Marrows, Melons)	1 417	1 350	5

2. SEASON QUALITY

2.1 Onset of the season

- 2.1.1 The season started in the second week of November in central and northwestern parts of the country (parts of Midlands, Masvingo, Mashonaland East, Manicaland and Matabeleland North)
- 2.1.2 The northern parts of the country (parts of Mashonaland Central, Mashonaland East and Manicaland) and the southern parts of the country (Masvingo and Matabeleland South), the season started in the second week of December.
- 2.1.3 In the remaining parts of the country, the season started between 21 and 31 December 2014.

2.2 Rainfall distribution pattern

- 2.2.1 Rainfall distribution was poor in space and time across the country except in the northern parts of Mashonaland Central (Rushinga, Mbire, Lower Mzarabani and lower Mt Darwin) and parts of Mashonaland East (Uzumba Maramba Pfungwe and Mudzi).
- 2.2.2 Floods were experienced in low lying areas of the Zambezi valley
- 2.2.3 Though the central and southern parts of the country had an early start to the season, the benefits were offset by poor distribution in the season
- 2.2.4 The first rains were followed by a long dry period leading to poor germination and severe moisture stress for the early planted crops.
- 2.2.5 Persistent and heavy rains were received across the country from the last week of December 2014 to the second week of January 2015.
- 2.2.6 There has been a long dry spell from the second week of January which lasted for over 60 days in most parts of the country.

FIG 2: DURATION OF DRY SPELL 2014/15 SEASON AS AT 11 MARCH 2015

FIG 3. ZIMBABWE WRSI FOR MAIZE FOR 2014/15 SEASON, AS OF 11 MARCH 2015

NB: *Water Requirement Satisfaction Index (WRSI) is a satellite derived map that shows the extent to which crops' water requirements was satisfied during the season*

FIG 4: ZIMBABWE SOIL WATER INDEX IN 2014/2015 SEASON AS AT 11 MARCH 2015

NB: Zimbabwe Soil Water Index (SWI) is a satellite derived map that shows the percentage of moisture in the soil .

3. AGRICULTURAL INPUTS SUPPORT

1. The Government Smallholder Input Support Facility was the major source of inputs.
2. Contract Farming Schemes also availed inputs.

3.1 Government Input Facility

TABLE 3: THE GOVERNMENT INPUT PROGRAMME

Input	Quantity (MT)			Quantity per household (kg)	No of beneficiaries
	Contracted	Supplied	%		
Maize seed	15 955	5 921	37	10	592 100
Sorghum seed	403	208	52	5	41 600
Millet	76	40	53	5	20 000
Soyabean	800	40	5	2	20 00
Cow peas	245	113	46	2	56 500
Cotton Seed	3 000	310	10	10	31 000
Cotton Chemicals (l)	60 206	43 214	72		
Cotton Chemicals (Mt)	61	45	74		
Compound D	72 496	31 382	43	50	627 640
Top dressing	58 150	15 304	26	50	306 080

1. Tobacco

16 Companies contracted farmers to grow **72 756** hectares of tobacco.

4. CROP SITUATION

4.1 Area Planted to Maize by Time of Planting

4.4 Other Crops

Tobacco

1. Crop stage ranges from vegetative to harvesting.
2. The late crop was affected by heavy leaching due to incessant rains received across the country.
3. False and flush ripening of the crop was experienced resulting in curing challenges.
4. The irrigated crop condition ranges from fair to good and the dry land crop is poor to fair.

FIG 13: CATTLE DISTRIBUTION BY PROVINCE

1. There has been an increase in the population of all classes of livestock in the year 2014.
2. Cattle population increased by **2%** from **5 368 105** in 2013 to **5 477 338** in 2014.
3. Although there is an increase in cattle numbers nationally some districts recorded a decline in the population of cattle, with Shamva district recording the highest decline of about **28%** in A2 sector.
4. Other districts recording a decline include Centenary, Mudzi, Hwedza, Sanyati and UMP.
5. Goat population increased by **3 %** from **3 941 247** in 2013 to **4 049 528** in 2014 while the population of sheep decreased by **12%** from **521 607** to **456 627**.

FIG 15: GOATS DISTRIBUTION BY PROVINCE

5.1 Livestock Condition

1. All classes of livestock, both ruminants and non-ruminants, were in fair condition in most communal areas and good in other sectors.
2. Cattle condition was affected by depleted grazing areas, inadequate drinking water and lack of deworming.

FIG 16: CATTLE CONDITION

Grazing and Stock feed Availability

3. Most areas in the country had adequate grazing.
4. Some parts of Matabeleland North and South, Manicaland, Midlands and Masvingo had inadequate grazing which may not last into the next season
5. Quality of grazing in some communal and Old Resettlement areas is poor as it is comprised mainly of grass species with poor palatability and low nutritional value due to overgrazing. The herbage yield of the veld is also low.
6. Stock feeds were available on the market though the majority of smallholder farmers could not afford them.

FIG 17: GRAZING AVAILABILITY

Fig 18: Dipping

5.2 Calving rates

The national average calving rate increased to **51%**, from **49%** in 2013/14.

6. LIVESTOCK HEALTH SITUATION

6.1 Foot and Mouth Disease (FMD)

6.1.1 A primary outbreak was reported in Mwenezi in April 2014 which later spread to Chivi in July and Mberengwa in August Masvingo in September and Gwanda in October.

6.1.2 The source was the cattle-buffalo contact at Nuanetsi Ranch.

6.1.3 Cases continue to be reported in Zvishavane and Mberengwa

6.1.4 Shurugwi is constantly under threat due to movement of cattle.

6.1.5 Control of the disease is underway

FIG 21: FOOT AND MOUTH DISEASE OUTBREAK 2013 AND 2014 SEASON

6.2 Rabies

Matabeleland South	54	45	20
Total	622	181	244

FIG 22: RABIES OUTBREAKS BY PROVINCE

TABLE 23: RABIES OUTBREAKS BY SPECIES

Species	2014	2013	(+/-) %
Cattle	59	28	111
Dogs	538	136	296
Goats	18	10	80
Donkeys	7	10	-30
Total	622	184	238

6.3 Anthrax

6.3.1 Outbreaks were reported in Buhera, Chipinge, Chivi, Gutu, Gwanda, Makoni, Mutare, Umguza and Zaka districts involving a total of **19 dip tanks** and killed **100 cattle**.

6.4 Tick-Borne Diseases

6.3.2 The common diseases in cattle were babesiosis (redwater), heartwater, anaplasmosis (gallsickness) and theileriosis (east coast fever).

6.3.3 Tick-borne diseases accounted for about **10%** of the total infections reported in cattle as compared to **20%** and about **8%** of cattle deaths reported due to diseases compared to **30%** in 2013.

6.3.4 Of these diseases heartwater and anaplasmosis affected more cattle (**80%**).

6.5 Other Diseases of Cattle

6.3.5 Other diseases were lumpy skin, blackleg, dermatophilosis (senkobo), and mastitis.

6.3.6 There was an increase in conditions of reproductive nature such as retained placentas, dystocia (difficult birth), uterine prolapses and milk fever which increase with poor nutrition.

6.6 Diseases of small stock

Sheep and goats

- The common diseases reported for sheep and goats were internal parasites, heartwater, orf, footrot, ophthalmia and mange.

Pigs

- The only major problem reported for pigs was mangemainly in the smallholder sector.

Poultry

- There were minor outbreaks of Newcastle disease recorded in 2014 affecting a few households. Suspected cases of the disease were reported in Binga and Hwange along the Zambezi River during the time of the assessment.
- Mass vaccinations could not be adequately done as scheduled due to constraints in vaccine production.
- Other diseases of birds reported in order of occurrence were coccidiosis, fowlpox, infectiouscoryza, and infectious bursal disease and a problem of external parasites mainly with the indigenous chickens.

FIG 23: NEWCASTLE OUTBREAK 2013 AND 2014 SEASON

6.7 Livestock Mortality

Table 24: Mortality of Cattle by Province

Province	Cattle mortality (%)		+/- %
	2014/15	2013/14	
Mashonaland West	5	7	-2
Mashonaland Central	6	7	-1
Mashonaland East	6	4	2
Manicaland	4	5	-1
Midlands	5	5	0
Masvingo	4	5	-1
Matabeleland North	4	4	0
Matabeleland South	4	7	-3
National Average	5	7	2

Fig 24: Mortality of Cattle by Province

Mortality in Small ruminants

1. Mortality rates for goats and sheep for 2014/15 season were above the acceptable mortality rate of **5%**.
2. Highest mortalities were recorded in kids and lambs, with kids contributing about 81% of the total mortality.
3. Kid mortality was recorded at 33%.

TABLE 12: MORTALITY OF GOATS AND SHEEP (2014/15 SEASON)

Province	Flock mortality (%)			
	Goats			Sheep
	Total mortality	Proportion of adult deaths	Proportion of kid deaths	
Mashonaland West	9	21	79	14
Mashonaland Central	10	24	76	19
Mashonaland East	10	20	80	13
Manicaland	8	20	80	14
Midlands	11	20	80	7
Masvingo	11	11	89	14
Matabeleland North	9	40	60	18
Matabeleland South	15	14	86	17
National Average	10	19	81	13

Tsetse control issues

1. Cumulatively approximately **52 000km²** of land was cleared of tsetse for crop and livestock production since independence in the farming communities.
2. Agriculture potential in the Tsetse cleared areas was enhanced through implementation of Tsetse control interventions
3. Total cattle numbers increased by **5%** from **250 694** in 2013/14 to **264 362** in 2014/15 in parts of Gokwe North, Kariba, Hurungwe, Makonde, Guruve, Mbire, Centenary, Mt Darwin, Mudzi, Rushinga, Nyanga North, Mutasa, Chipinge and Chiredzi.
4. Calving rates also increased from **41%** in 2013/14 to **42%** in the 2014/15 season in the same areas.
